

JÖNKÖPING UNIVERSITY
School of Health and Welfare

Dear Student,

Welcome to the School of Health and Welfare, Jönköping University.

The education at the School of Health and Welfare is conducted in a flexible and inter-professional environment, where simulation and digital techniques are combined with theoretical education.

What is significant about our education and research is that it is performed in close collaboration with the surrounding society to ensure an attractive, relevant and high-quality education. Societal benefit is the hallmark of the School of Health and Welfare to support the creation of long-term sustainable health, welfare and care. To accomplish this, our international collaborations are of great value and benefit.

The School of Health and Welfare offers undergraduate programmes within Biomedical Laboratory Science, Dental Hygiene, Diagnostic Radiology Nursing, Nursing, Occupational Therapy, Prosthetics and Orthotics, Social Work, as well as separate courses in Gerontology.

At the advanced level, we have eight master programmes within our different academic fields. We also have a broad framework of commissioned educations with participants from all over the world.

The education at School of Health and Welfare aims to deepen students' theoretical and practical knowledge, and to educate future employees. To enable students to practice and develop their skills, the School of Health and Welfare has several high-tech simulation labs.

The research focusing on health and welfare has a broad interdisciplinary approach to theories, methods and knowledge from different areas. There is also a Research School of Health and Welfare with around 60 Ph.D students engaged in the ongoing research as well as in the education.

For those of you who are studying on-campus, our campus offers an outstanding array of events, activities, organizations, and extracurricular programmes in which you can become involved!

Once again, welcome to the School of Health and Welfare.

Eleonor Fransson
Dean and Managing Director
School of Health and Welfare,
Jönköping University
